WHAT IS CONTENT CURATION (BETH KANTER)

Content curation is the process of sorting through the vast amounts of content on the web and presenting it in a meaningful and organized way around a specific theme.

- ▶ The work involves sifting, sorting, arranging, and publishing information.
- ▶ A content curator picks the best content that is important and relevant to share with their community.
- ▶ It isn't unlike what a museum curator does to produce an exhibition: They identify the theme, they provide the context, they decide which paintings to hang on the wall, how they should be annotated, and how they should be displayed for the public.
