GETTING SMART

Blended Learning

Blended learning is a formal education program in which a student learns:

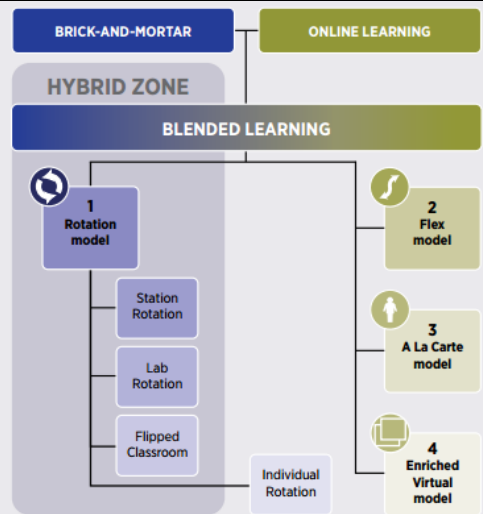

at least in part through online learning, with some element of student control over time, place, path, and/or pace;

at least in part in a supervised brick-and-mortar location away from home;

and the modalities along each student's learning path within a course or subject are connected to provide an integrated learning experience.

Summit Schools

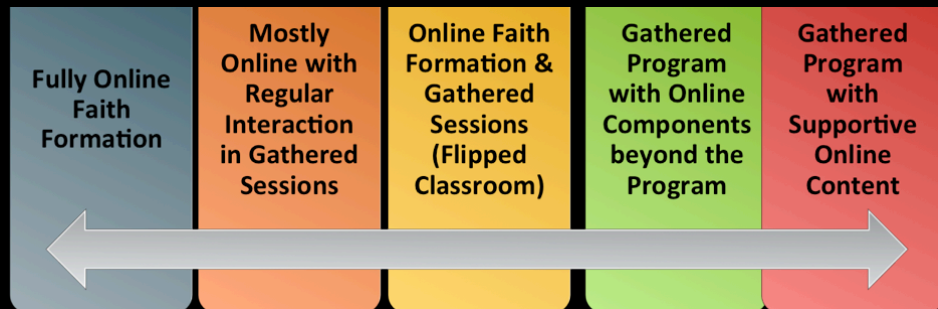

Summit's PERSONALIZED SCHOOLS

A personalized school is designed to meet the needs of **each & every individual student**.

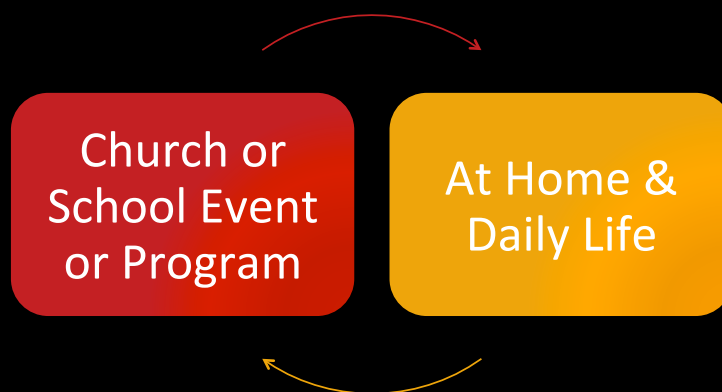

At Summit, we focus on four key elements of college and career readiness, and empower students to drive their learning and own their success.

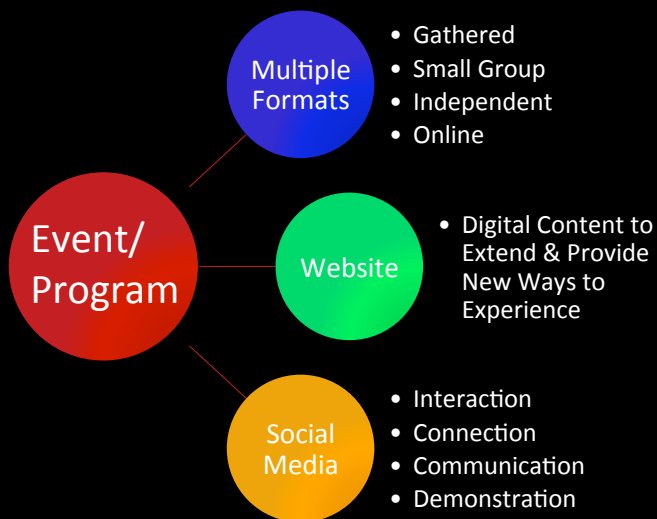

Digitally Enabled & Digitally Connected Faith Formation

Flip the Model

Our Confirmation preparation program has two components: Once a month in-person classes and an online study. The online study is a place for students to develop their faith weekly by completing multi-media lessons which include videos, reading, Saint reflections, multiple-choice questions and online small group discussions. Each small group has their own online space to discuss faith topics, ask questions, and pray for one another. By having both in person classes and an online study we hope to help families learn more about their faith while respecting the many demands for their time.
